Is Your Cooling Water System Heating Up Your Power Bills?

Biofouling & Scalings are just two of the many troubles that will reduce your cooling water system's efficiency. Your Standard Plate Count (SPC) result might be good, but that does not simply imply that your system is running at its optimal.

Sub-optimal operations reduces your business profits just like a dripping tap! Stop the "leak" by letting us identify it for you TODAY!

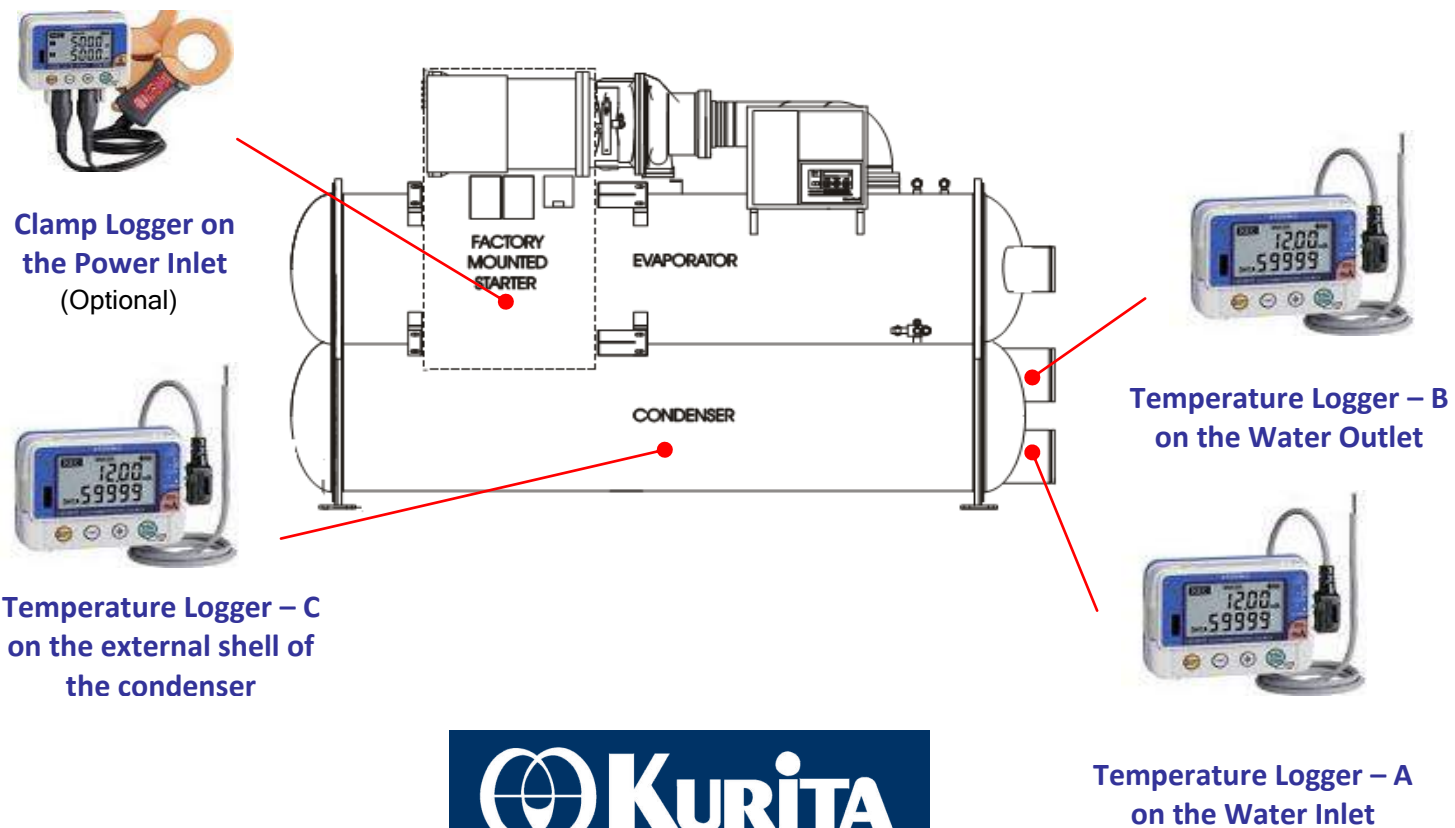

Using our Condenser Performance Assessment by LTD (Leaving Temperature Difference)

Try our one-time demo today for

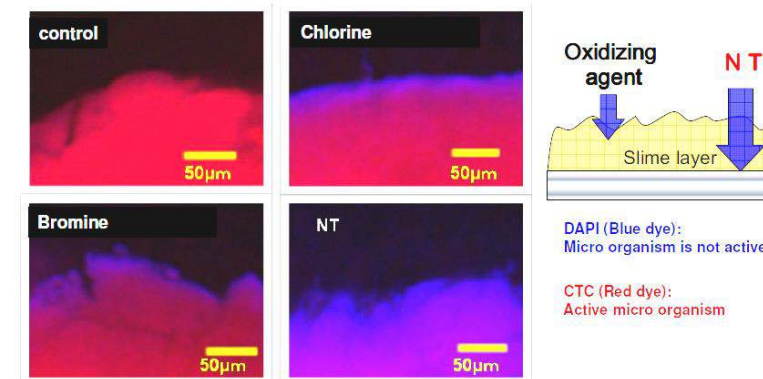

Introducing Our Non-Invasive Test Kit to Find Out Now!

Our state of the art technology ensures that we can test your system's efficiency without any alteration! Just Plug and Play!

Remedy With Peace of Mind!

Slime Penetration Technology

TOWERCLEAN NT
Your Cooling System Hero

Oxidizing agent ineffective penetrates slime layer
NT Penetrates & Remove Slime Layer (Biofilm)

Let's Keep the Tubes Clean!

How Much Can You SAVE?

With Kurita's solution, you may see tangible savings as illustrated:
Simulation based on 1000 RT chiller system
Assume our treatment reduces only a small 1°C LTD difference for you.

The difference of just 1°C LTD is enough to save you **over \$25,000** per year / chiller!
